Throughout the rest of this questionnaire, I will be asking you to answer a number of questions about three specific time periods, namely the past 30 days, the past 12 months, and your lifetime. To help you remember the first two time periods, let’s mark this calendar with the beginning dates for each one of them.

Now let’s think about the past 30 days. According to the calendar, [fill in date] was 30 days ago, so I will write [fill in date] here on the calendar. I’ll call that your 30-day reference date.

A number of questions will ask about the past 12 months, that is since this date last year. Let’s look at the calendar and find that date — [fill in date]. I’ll call that your 12-month reference date.

Please use this calendar as we go through the interview to help you remember when different things happened. I will remind you to think about your 30-day reference date and your 12-month reference date when I ask you questions.

Inhalants

INHINTRO These next questions are about liquids, sprays, and gases that people sniff or inhale to get high or to make them feel good. We are not interested in times when you inhaled a substance accidentally — such as when painting, cleaning an oven, or filling a car with gasoline.

The questions use the term “inhalant” to include all the things listed below, as well as any other substances that people sniff or inhale for kicks or to get high. Take a moment to look at the substances listed below so you know what kinds of liquids, sprays, and gases these questions are about.

Amyl nitrite, “poppers,” locker room odorizers, or “rush”
Correction fluid, degreaser, or cleaning fluid
Gasoline or lighter fluid
Glue, shoe polish, or toluene
Halothane, ether, or other paint solvents
Lighter gases, such as butane or propane

INTROST1  These questions ask about the use of drugs such as amphetamines that are known as stimulants, “uppers,” or “speed.” People sometimes take these drugs to lose weight, to stay awake, or for attention deficit disorders.
